CSP026 VINTAGE PHASE 90

DESCRIPTION

- Hand-wired circuit board built with original-spec 1975 components
- Original high-quality Switchcraft Input/Output jacks and Carling bypass switch
- Hand-selected FETs, matched to produce deep and rich phasing
- All analog circuitry for warm analog tone

POWER

The MXR Phase 45 is powered by one 9 volt battery, accessed by removing the bottom plate of the pedal.

CONTROLS

- Footswitch toggles effect on/bypass
- Speed knob regulates overall effect rate

DIRECTIONS

- Run a cable from your guitar to the Vintage Phase 90's Input jack and run another cable from the Vintage Phase 90's Output jack to your amplifier.
- Set the Vintage Phase 90's Speed control knob to the 12 o'clock position.
- Turn the effect on by depressing the footswitch.
- Rotating the Speed knob in a clockwise motion results in a faster phase effect, counterclockwise for a slower effect.
