

# WESTMINSTER EFFECTS 1517 OVERDRIVE

## HOW DOES IT WORK?

**Volume** - Controls the output level.

**Gain** - Controls the amount of distortion in the circuit, turn it to the left to clean up your signal.

**Treble** - A passive treble cut: All the way the right allows all high frequencies through.

**Cut** - Cuts bass and alters the sweep of the Timbre knob. Useful when switching between humbuckers and single coils or when using as a boost.

**Texture** - Limiting circuit that introduces an additional hard clipping gain stage past noon.

**Timbre** - Adjusts the upper midrange frequencies of the drive section. To the right produces a brighter tone with more available gain.

## POWER REQUIREMENTS

**9V Center Negative** - Using anything else will ruin your pedal and void the warranty. Consumes 70mA.

## WARRANTY

All Westminster Effects carry a limited lifetime warranty for pedals sold within the United States and a one-year warranty for pedals sold internationally, for workmanship and components. The warranty does not cover misuse or damage due to accidents. Tampering with components such as trimpots voids the warranty.
