

V9 Lemon Squeezer

Precautions

PLEASE READ CAREFULLY BEFORE PROCEEDING

Power supply

Please connect the designated AC adapter to an AC outlet of the correct voltage. Please be sure to use only an AC adapter which supplies 9V (+10%) DC, center minus. The maximum working voltage shall not exceed 18V, otherwise may be dangerous equipment damage, fire, or other problems. Unplug the AC power adapter when not using or during electrical storms.

Connections

Always turn off the power of this and all other equipment before connecting or disconnecting, this will prevent malfunction and/or damage to other devices. Also make sure to disconnect all connection cables and the power cord before moving this unit.

Handling

Do not apply excessive force to the switches or controls.
Do not let paper, metallic, or other objects into this unit.
Take care not to drop the unit and do not subject it to shock or excessive pressure.

Cleaning

Clean only with a soft, dry cloth. If necessary, slightly moisten the cloth. Do not use abrasive cleanser, cleaning alcohol, paint thinners, wax, solvents, cleaning fluids, or chemical-impregnated wiping cloths.

Interference with other electrical devices

Radios and televisions placed nearby may experience reception interference. Operate this unit at a suitable distance from radios and televisions.

Location

To avoid deformation, discoloration, or other serious damage, do not expose this unit to the following conditions:

- .Direct sunlight
- .Heat sources
- .Magnetic fields
- .Extreme temperature or humidity
- .Excessive dusty or dirty location
- .High humidity or moisture
- .Strong vibration or shocks

Main features

- .The Lemon Squeezer is 9-voltate supply pedal but with a higher head room and improved clarity
- .100% analog circuit design
- .Distortion is kept low so good tone is maintained
- .Greatly increases the sustain of guitar notes and chords

- .Compresses dynamic range so all signals above the level set by the THRESHOLD are kept at about the same volume
- .Total (true) bypass

Panel instruction

1.TRUE BYPASS Footswitch:

Push down the footswitch to switch between effects and bypass status

2.ON/OFF LED:

Instructs Effects or bypass status of Phaser king, when the LED is lit up, the effects is on.

3.DC IN Power Jack:

For power supply, use a 9V DC regulated AC adapter(plug polarity is positive on the barrel and negative in the center).

4.INPUT Jack:

1/4" mono audio jack, for connecting guitar.

5.OUTPUT Jack:

1/4" mono audio jack, outputs the signal.

6.Compression BLEND Knob:

The Compression BLEND allows you to mix clean tone in parallel with the compressed sound in order to restore natural pick attack and overall transparency.

7.Threshold Knob:

The Threshold control sets the compressor's threshold. This wide range knob is VERY powerful imparting everything from subtle optical limiting at lower settings to outrageous amounts squash and sustain at higher settings.

8.VOLUME Knob:

The VOLUME control sets the overall output level of the compression section.

Specifications

Input: 1/4" monaural jack (impedance: 470k ohms)

Output: 1/4" monaural jack(impedance: 10k ohms)

Power Requirements: AC adapter 9V DC (center minus plug)

Current Draw: 50 MA

Dimensions:46 (W) *94 (D) *50 (H) mm

Accessories: Owner's manual
