

## RING MODULATOR

**BLEND** - Mixes the dry and ring-modulated signal. Fully CCW is dry only. Turn CW for more ring modulation.

**FREQUENCY** - Controls the speed of the ring modulator's oscillator. Lower settings become pulsing. Higher settings become metallic and bell-like.

**TWEAK** - Adjusts the function set by the MODE toggle.

**MODE** - Selects between two ring modulation algorithms. Down ("Earworm Mode") sets TWEAK to control LFO modulation speed. Up ("Green Lantern Mode") sets TWEAK to blend in a Green Ringer inspired octave effect.

### JACKS

**INPUT** – 1/4" jack, right side.

**OUTPUT** – 1/4" jack, left side.

**POWER** – 9VDC center negative, 65mA. Do not exceed 9VDC or the warranty is void.
